

MATC – Upgrading the Horizon Client

As part of the Horizon View upgrades on the MATC campus, some older versions of **Horizon Client** are no longer compatible with the newer software. Below are instructions on how to upgrade the Horizon Client.

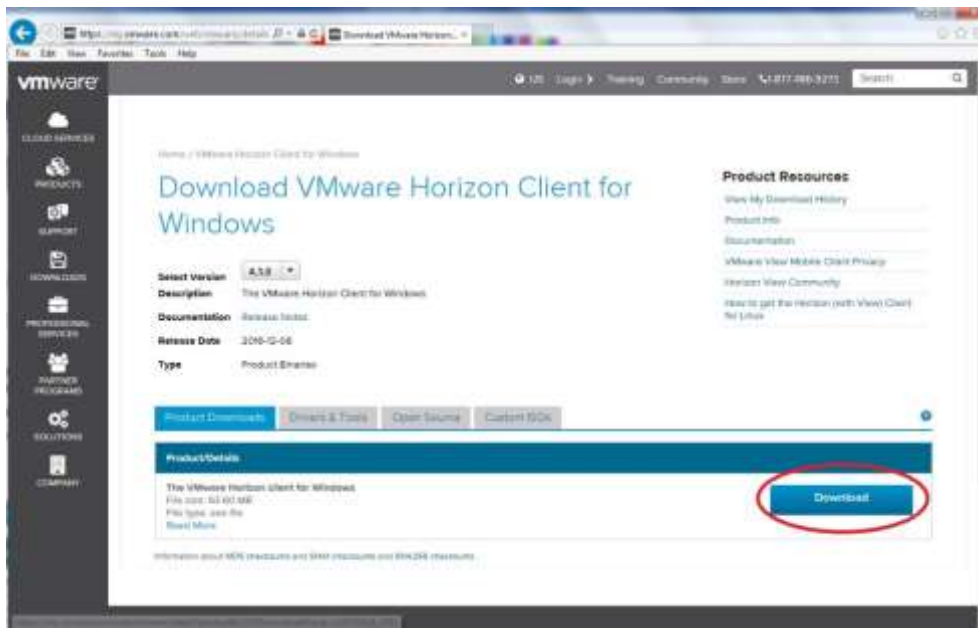

- 1) Open Internet Explorer, Firefox or Chrome, and go to <https://vdiweb.matc.edu>
- 2) Click on “Install VMWare Horizon Client”

- 3) Next, Click on “Go to Downloads” for “VMWare Horizon Client for Windows”

- 4) Click on the “Download” button

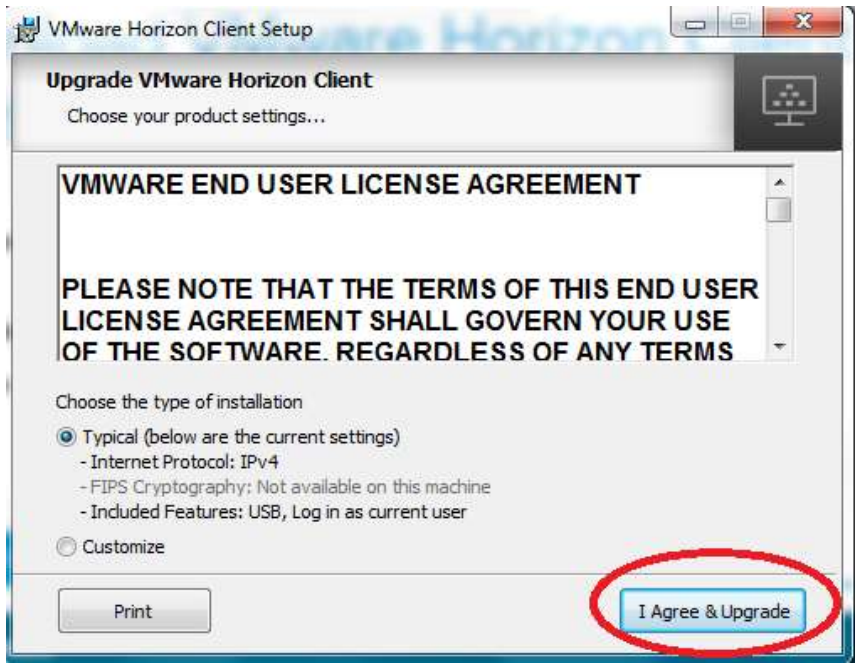

- 5) In Internet Explorer, click “Run” to run the installation file. It will download and run.

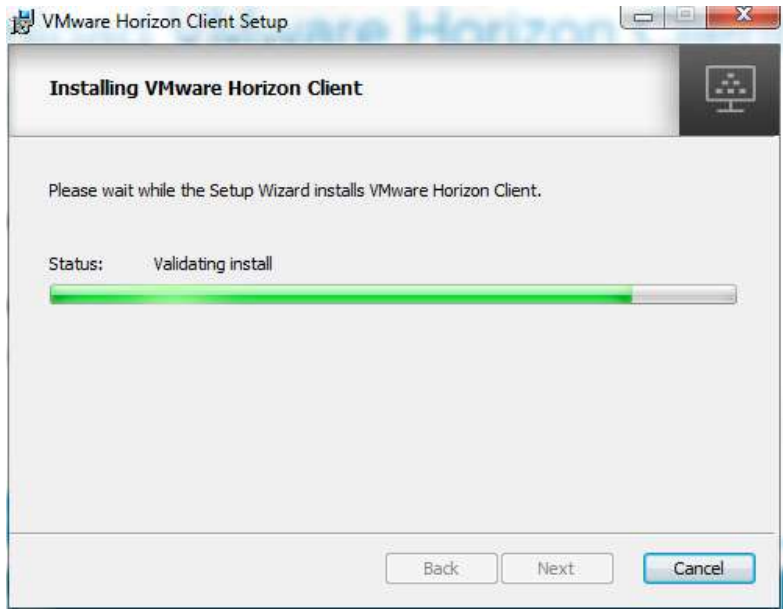

For other browsers, either save the file in a known location, such as the desktop or downloads folder, and when download completes, double click the file to run it.

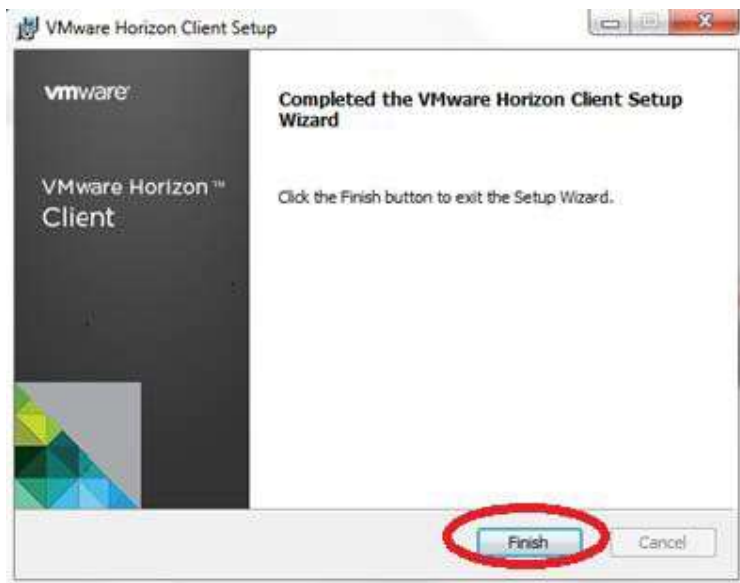

- 6) If prompted by User Account Control, click ‘Yes,’ ‘OK’ or ‘Continue’ to continue.
- 7) Follow the installation prompts to upgrade the program.
- 8) Click “I Agree & Upgrade”

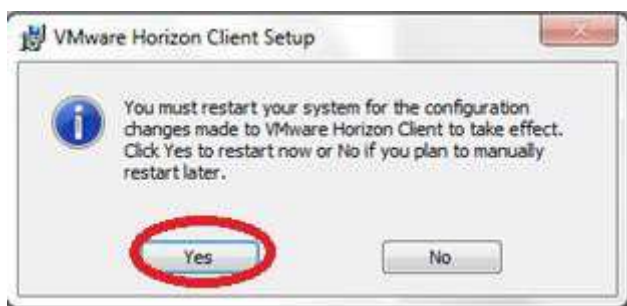

Installer will upgrade the software; allow the progress bars to complete. Do not click anything.

9) When you see this screen, click "Finish"

10) When prompted, restart your computer. Please save any open work and click "Yes" to restart.

11) Start the Horizon Client again after the restart finishes and connect to your desktop
